

Cognitive Science Timetable

These modules are delivered within the Cognitive Science programme. Most students in the taught masters programme will take the 8 modules listed as 7.5 credits each, i.e. PSY40020, COMP47230, COMP40250, PHIL40010, PSY40550, COMP40260, COMP40270, COMP40280. Substitutions are possible, but must be approved by the programme director.

To see the module descriptor for a given module, use the URL www.ucd.ie/modules/<CODE>, e.g. www.ucd.ie/modules/PSY40020.

In response to the ongoing Covid19 crisis, participation in person on campus will not be necessary for students in the programme during the first trimester. If module substitutions are agreed, it may be necessary to check the delivery mode of substituted modules. First trimester modules will be delivered using a variety of means, including the provision of video and text materials to be engaged with before online class sessions. Details will vary from module to module.
